

Acommodated Building Solutions

THE AUSTRALIAN ARMY UNVEILS VEHICLE SHELTER SHED AT PUCKAPUNYAL MILITARY BASE, VICTORIA

With countless hours of design, site-specific engineering planning, negotiation and keeping up with Australia's strict building standards has deemed successful for Accommodated Building Solutions. Recently managing this unique steel building project in its entirety from inception, site works, kit supply and construction. To deliver a wide spanned tank museum for the Australian Defence Force, Historical Unit in Puckapunyal, Victoria.

Stationed within the small restricted access town of Puckapunyal, the unit is responsible for developing policy and programs for collection, conservation, interpretation and exhibit of the Australian Army's history. The Puckapunyal Historical Unit specifically collects, preserves and showcases our nation's Australian Light Horse and Armoured Corps, providing Australia's an insight into our rich history.

At the beginning of 2016, Accommodated Building Solutions was engaged to take on the challenge of designing and constructing a pre-engineered building at the Victorian Defence base. The team configured the best solution for the Historical Unit's visionary museum and shed. The local Australian brand was chosen as the steel kit supplier of choice for their investment.

An impressive standout at the Puckapunyal Military Base, the museum featured the super strength of a BlueScope cold rolled steel portal frame. With a dimensional span of 42 metres by 23

metres, with seven bays with one side enclosed and the other completely open. A unique project, the scope of the works undertaken by Accommodated Building Solutions included taking on the entirety of the project. Including supply and construction inclusive of site preparation, drainage and electrical reticulation of the 42 metre by 23-metre clear span shelter.

"From the inception of the project, through the procurement and delivery phases, to the completion, I have been impressed with the attitude and performance of Accommodated Building Solutions."

AC Coates, Lieutenant Colonel, said "From the inception of the project, through the procurement and delivery phases, to the completion, I have been impressed with the attitude and performance of. All construction advice and techniques were offered in good faith and well explained, thus allowing me to make informed decisions regarding final outcomes and

budgetary management. The efforts of Accommodated Building Solutions throughout the entire process have resulted in the delivery of a first class product that will contribute to the reputation of the Army Historical Unit into the future".

Director of Accommodated Building Solutions, Mark Goodwin said, "This has been a great opportunity for our business to show what we are capable of, our team thrives on a challenge, and we were so thrilled to bring the Australian Defence Forces' vision into life form."

Quality steel buildings can be completely customised regarding length, span and height to best maximise your requirements. They also supply a diverse range of optional extras to ensure your new building exceeds your expectations. Delivering leading engineering, ultimate strength and versatility is all part of the package with THE Shed Company's Australian steel buildings.

Accommodated Building Solutions are partnered with THE Shed Company which is a division of the Steelx Group, an Australian owned and operated family business. Proudly using industry leading steel by BlueScope exclusively and manufacturing all building kits in Australia. Each year the company invests millions of dollars into extensive research and development to deliver the most technically advanced, premium quality steel buildings.

AUSTRALIAN GOVERNMENT DEPARTMENT OF DEFENCE

A new tank museum they can be proud of, the Australian Defence Force engaged THE Shed Company Kilmore to design and construct their new 42 metre by 23 metre shed at Puckapunyal, Victoria.
